“Parent and Care Coordination Panel”

Taylor Naus, MSW, LSW
Care Coordinator, Children’s TiPS
Behavioral Health Therapist I
Children’s Community Pediatrics Behavioral Health Services
Children’s Hospital of Pittsburgh of UPMC

Taylor Naus, MSW, LSW received her master’s degree from University of Pittsburgh School of Social Work, with specialization in direct practice and certificate in mental health. She completed various field placements in the children’s mental health field including master’s placement at Southwood Psychiatric Inpatient and undergrad field placement at Fox Run Residential Treatment Facility and Florence Crittenton Services for teen moms. She joined Children’s Hospital Behavioral Health Division in 2017, and is currently and Behavioral Health Therapist I for Children’s TiPS program. Prior to joining Children’s Hospital of Pittsburgh, Taylor worked at UPMC East providing medical case management and at Community Alternatives as a Behavioral Specialist providing wraparound services.

Kelley Victor, MD
Clinical Assistant Professor of Psychiatry
Children’s Hospital of Pittsburgh
Western Psychiatric Institute and Clinic of UPMC

Dr. Kelley J. Victor, MD received her Bachelor’s degree in biology from the University of Iowa and went on to receive her doctorate in medicine from the University of Iowa, Carver College of Medicine. She completed her residency training in adult psychiatry and fellowship in child psychiatry at Western Institute and Clinic (WPIC). She was the chief resident of the child and adolescent fellowship program. Currently, Dr. Victor works for Children’s Community Pediatrics where behavioral health is integrated into primary care clinics. She is also working with the TiPS program and providing telepsychiatry services. She is a Clinical Assistant of Psychiatry at WPIC. Her interests include trauma and grief, palliative care and integration of care in the medical home.

Family Members on Panel

Abstract – Introductory
This presentation will discuss the importance of behavioral health care coordination in primary care settings, give a brief overview of general behavioral health information, and present the aspects of behavioral health care coordination. The group will discuss case examples, using care coordination strategies for problem solving and patient support.
By the completion of this session, participants should be able to:

1. Describe behavioral health care coordination and why it’s important
2. Recognize the aspects of behavioral health care coordination and how they improve patient experience and outcomes
3. Identify strategies to implement behavioral health care coordination in a primary care setting
